

aaRashmi Rai

Azure DevOps Engineer/ SRE / Azure Cloud platform Engineer

[6364120354 | | <https://www.linkedin.com/in/rashmi-rai-23328825b> | | rairashmi120@gmail.com]

Professional Summary

Azure DevOps Engineer with **4 years** of experience in cloud infrastructure management, CI/CD automation, and containerization. Expertise in building, deploying, and scaling applications on Azure using tools like Azure DevOps, Kubernetes, Docker, and Python. Skilled in managing cloud services including Azure Storage, Key Vault, Databricks, and integrating observability solutions such as New Relic. Proven ability to enhance development workflows, ensure application security, and provide efficient cloud solutions.

Technical Skills

- **Cloud Platforms:** Microsoft Azure (AKS, Azure DevOps, Storage Accounts, Key Vault, App Registration, Databricks, Unity Catalog)
- **CI/CD Tools:** Azure DevOps
- **Version Control:** Git, GitHub, Gitlab
- **Containerization & Orchestration:** Docker, Kubernetes, Helm
- **Infrastructure as Code (IaC):** Terraform, ARM Templates
- **Programming/Scripting:** Python, PowerShell, Bash
- **Data Engineering/Integration:** Databricks, Astronomer, Pinot, Dataiku
- **Security:** Azure Key Vault, App Registration, RBAC, SSL/TLS
- **Monitoring & Observability:** New Relic, Prometheus.
- **API Testing & Integration:** Postman
- **Agile & Project Management:** Jira, Scrum

Professional Experience

Azure DevOps Engineer

Ltimindtree pvt ltd, Bangalore

- Assisted in building and maintaining **CI/CD pipelines** in **Azure DevOps** and **Gitlab**, utilizing **Git** for version control.
- Automated container deployment using **Docker** and **Kubernetes**. Collaborated with the development team to optimize and troubleshoot **Kubernetes** deployments and cloud configurations.
- Supported **Postman** API testing for service integration, ensuring the reliability and correctness of services before production release.
- Integrated **Azure Storage Accounts** for data storage needs, optimizing performance and cost-efficiency for cloud storage. Implemented **Azure Key Vault** to securely store and manage application secrets for multiple development environments.
- Worked with **Azure App Registration** to set up and manage app permissions for Azure services, streamlining security protocols. Collaborated with data teams to set up **Databricks** environments, enabling large-scale data processing and analytics.
- Implemented **Astronomer** to automate data pipelines, ensuring consistent data flow between applications and databases. Integrated **New Relic** to monitor application performance and provide actionable insights for improvement.

Education

Bachelor of Science in Computer Science

Microtek collage Varanasi [June 2019]

Certifications

- **Azure DevOps training**

Projects

Seven-Eleven DATA LAKE PROJECTS -Enterprise Data Platform – DevOps on Azure Kubernetes Service (AKS)

Role: DevOps Engineer / SRE / Azure Cloud platform Engineer

Part of the Enterprise Data DevOps Team responsible for managing the full lifecycle of applications deployed on Azure Kubernetes Service (AKS). The role involved provisioning, deployment, monitoring, scaling, and securing AKS clusters to support enterprise data applications and platforms.

Technologies used: Azure, AKS, Azure DevOps, Helm, Kubernetes, Docker, New Relic, Git, YAML, Terraform

Key Responsibilities:

- Gathered application requirements and coordinated with the Cloud Engineering Team for AKS cluster provisioning.
- Performed post-provisioning tasks: validating connectivity, configuring RBAC, deploying Kubernetes Dashboard, and integrating Azure AD.
- Created and managed Kubernetes manifests, Helm charts, secrets, config maps, and ingress services configurations.
- Built CI/CD pipelines in Azure DevOps for automated deployment of data and platform applications (e.g., OPS_WB, PINOT, DREMIO, Dataiku, Astronomer).
- Configured autoscaling for node pools and ensured resource limits for optimized performance.
- Implemented RBAC, SSL/TLS, and vulnerability mitigation for secure cluster operations.
- Integrated New Relic for monitoring and logging of AKS workloads and infrastructure.
- Managed upgrades, certificate renewals, and routine maintenance of AKS clusters.
- Provided L2/L3 support, coordinated with Microsoft for infrastructure issues, and maintained detailed documentation for processes and upgrades.

Additional Information (Optional)

- **Languages:** English (Fluent), Hindi (Fluent)
- **Volunteer Work:** (Leadership for SSL certificates, SP and SAS URI renewal TASK, AKS Deployment, E2E Gitlab migration from azure CICD)
